# MATERIAL HANDLING CRANE

BUILT FOR STRENGTH.  
RAISED FOR EXCELLENCE.

Advanced material handling cranes designed for building construction and infrastructure development with maximum safety, stability and efficiency.

- 

**HIGH LIFTING CAPACITY**  
Handles heavy loads with ease and precision.
- 

**ADVANCED SAFETY SYSTEM**  
Equipped with limit switches, anti-collision and overload protection.
- 

**STRONG & DURABLE**  
Heavy duty structure for long life and reliable performance.
- 

**SMART CONTROL SYSTEM**  
Smooth operation with modern electronic control system.
- 

**WIDE APPLICATION**  
Ideal for high-rise buildings, bridges, industrial and infrastructure projects.

- 

**MAX LIFT CAPACITY**  
10 – 25 TON
- 

**MAX JIB LENGTH**  
50 – 70 METER
- 

**MAX HOOK HEIGHT**  
100 – 200 METER
- 

**APPLICATION**  
Building Construction  
Infrastructure Development

# LATEST TECHNOLOGY CM60M³ CONCRETE BATCHING PLANT

PRECISION. PERFORMANCE. PRODUCTIVITY.

High performance CM60M³ Concrete Batching Plant with advanced automation, reliable operation and superior mix quality for all construction needs.

- 

**HIGH PRODUCTIVITY**  
60 m³/hr output for large scale construction projects.
- 

**ADVANCED AUTOMATION**  
Fully automatic control system for accurate batching and ease of operation.
- 

**PRECISE WEIGHING SYSTEM**  
High accuracy in weighing of aggregates, cement, water and additives.
- 

**ROBUST & RELIABLE**  
Heavy duty structure with high quality components for long life.
- 

**EASY MAINTENANCE**  
User friendly design for quick maintenance and minimal downtime.

- 

**PLANT CAPACITY**  
60 M³ / HR
- 

**AGGREGATE BINS**  
4 x 10 m³
- 

**MIXER CAPACITY**  
1.0 m³
- 

**CONTROL SYSTEM**  
PLC Based Fully Automatic
- 

**CEMENT SILO**  
2 x 100 TON (Optional)

# ROOF TILES MAKING MACHINE

## HIGH PERFORMANCE SOLUTION

Advanced technology for producing high quality roof tiles with high strength, uniform shape and excellent finish.

### AUTOMATIC OPERATION

Fully automatic operation for higher efficiency and less labor.

### HIGH PRODUCTION CAPACITY

Designed for continuous production and maximum output.

### PREMIUM QUALITY TILES

Produces strong, durable and weather resistant roof tiles.

### LOW MAINTENANCE

Robust design with easy maintenance and long life.

### ENERGY EFFICIENT

Optimized system for low power consumption.

# HYDRAULIC CLAY & CEMENT BRICKS BLOCK MAKING MACHINE

## MULTIPLE PRODUCTION

High performance hydraulic machine for producing clay & cement bricks, solid blocks and hollow blocks with precision and efficiency.

### MULTIPLE PRODUCTIVITY

Produces bricks, solid blocks and hollow blocks.

### HIGH PRESSURE HYDRAULICS

Powerful hydraulic system ensures high density and consistent quality.

### STRONG & DURABLE

Heavy duty structure for long life and reliable performance.

### EASY TO OPERATE

User friendly controls for smooth and safe operation.

### LOW MAINTENANCE

Simple design for easy maintenance and minimum downtime.

## MANUAL HYDRAULIC WITH VIBRATION TECHNOLOGY MULTI PURPOSE MACHINE

### HYDRAULIC POWER

High pressure hydraulic system for powerful and smooth operation.

### VIBRATION TECHNOLOGY

Ensures high density, strength and consistent finish of products.

### MULTI PURPOSE

Produces hollow blocks, paver blocks, solid bricks, fly ash bricks, curb stones and more.

### STRONG & DURABLE

Heavy duty MS structure for long life and reliable performance.

### EASY TO OPERATE

Manual operation with user friendly controls and low maintenance.

### COST EFFECTIVE

Low investment, high output and maximum profitability.

### IDEAL FOR

HOLLOW BLOCKS

PAVER BLOCKS

SOLID BRICKS

FLY ASH BRICKS

CURB STONES

## MOBILE CLAY BRICKS MAKING MACHINE

### MOBILE & PORTABLE

Mounted on wheels for easy movement and on-site production.

### HIGH PRODUCTION CAPACITY

Produces a large number of high quality clay bricks in less time.

### POWERFUL PERFORMANCE

Heavy duty engine and advanced mechanism for reliable operation.

### UNIFORM BRICK QUALITY

Ensures uniform size, shape and high compressive strength.

### EASY MAINTENANCE

Simple design for easy maintenance and long machine life.

### IDEAL FOR CLAY BRICKS

HOUSING

INFRASTRUCTURE

CONSTRUCTION

RURAL DEVELOPMENT

# RECYCLING PLASTIC SHEET MAKING MACHINE

## ADVANCED & SUSTAINABLE SOLUTION

Our Recycling Plastic Sheet Making Machine converts waste plastic into high-quality, durable sheets used in a wide range of applications.

### ENVIRONMENT FRIENDLY

Transforms waste plastic into reusable sheets and reduces environmental pollution.

### HIGH QUALITY OUTPUT

Produces strong, uniform and smooth sheets with excellent finish.

### ADVANCED TECHNOLOGY

Equipped with modern hydraulics and precise controls for efficient operation.

### MULTI APPLICATION

Sheets can be used for pallets, boards, packaging, construction and more.

### LOW MAINTENANCE

Robust design ensures longer life and minimal maintenance.

# BATCHING PLANT

## HIGH PERFORMANCE CONCRETE BATCHING SOLUTION

### RELIABLE. ACCURATE. EFFICIENT.

Our Batching Plant is engineered for high accuracy, consistent performance and maximum productivity in every mix.

### ACCURATE BATCHING

High precision weighing system ensures accurate proportioning of all materials.

### HIGH PRODUCTIVITY

Designed for continuous operation and maximum output with minimum downtime.

### DURABLE & ROBUST

Heavy-duty structure built to withstand harsh working conditions.

### EASY OPERATION

User-friendly controls for smooth and efficient operation.

### CUSTOMIZABLE OPTIONS

Available in various capacities and configurations to suit project needs.

## HMI DISPLAY

### SMART INTERFACE. INTELLIGENT CONTROL.

Our HMI Display provides a user friendly interface with real-time monitoring, data visualization and seamless machine control.

**HIGH RESOLUTION TOUCH SCREEN**  
Clear and bright display with multi-touch capability.

**REAL-TIME MONITORING**  
Live data, alarms, trends and performance analytics.

**USER FRIENDLY INTERFACE**  
Intuitive design for easy operation and quick navigation.

**RUGGED & RELIABLE**  
Industrial grade build for harsh environments and long life.

**MULTIPLE CONNECTIVITY**  
Supports Ethernet, USB, RS232/485 and more.

## PLC CONTROLLER

### PRECISE CONTROL. MAXIMUM EFFICIENCY.

Our PLC Controller delivers high-speed performance, reliability and flexibility for industrial automation applications.

**HIGH PERFORMANCE**  
Fast processing speed and accurate control for complex tasks.

**MODULAR & SCALABLE**  
Flexible I/O expansion to meet growing application needs.

**RELIABLE & DURABLE**  
Built for continuous operation in demanding environments.

**MULTIPLE COMMUNICATION**  
Supports Ethernet, Modbus, Profibus, CAN, RS232/485 and more.

**EASY PROGRAMMING**  
User friendly software for quick development and maintenance.

# FULLY AUTOMATIC FLY ASH BRICKS MAKING MACHINE

Automatic heavy duty  
upper press Fly Ash Bricks  
Making Machine

-  Heavy Duty Upper Press System
-  Strong & Durable Structure
-  Efficient Hydraulic Performance
-  Precision Punch & Die System
-  Low Maintenance Operation

## KEY BENEFITS

- ✓ High Production Capacity
- ✓ Durable Build
- ✓ Low Maintenance
- ✓ Efficient Operation

## APPLICATIONS

- ✓ Fly Ash Bricks
- ✓ Solid Blocks
- ✓ Paver Blocks
- ✓ Hollow Blocks
- ✓ Interlocking Blocks

## WHY SUPERFORCE?

- ✓ High Quality Machines
- ✓ Long Life & Durability
- ✓ Expert Support & Service
- ✓ Better ROI

## PRODUCT HIGHLIGHTS

- ✓ Fully Automatic Operation
- ✓ Smart Hydraulic System
- ✓ Precision Engineering
- ✓ Consistent Quality Output

**ENGINEERED FOR STRENGTH. BUILT FOR THE FUTURE.**

**YELLOW OXIDE**

**Y-313**

**RED OXIDE**

**RED 101**

## OXIDE COLOUR FOR PAVER & TILES MAKING

### PREMIUM QUALITY OXIDE POWDERS

High quality oxide colors for paver blocks, tiles, bricks and other concrete products.

- ✓ RICH & VIBRANT COLOURS
- ✓ EXCELLENT UV RESISTANCE
- ✓ HIGH COLOUR STRENGTH
- ✓ CONSISTENT QUALITY
- ✓ EASY TO MIX & USE

## VIBRO MANUALLY BRICKS, PAVER & HOLLOW BLOCK MAKING MACHINE

### MULTI-PRODUCTION MACHINE

Efficient and durable manually operated machine for making bricks, paver blocks, solid blocks and hollow blocks with ease.

-  MAKES BRICKS, PAVERS, SOLID & HOLLOW BLOCKS
-  VIBRATION ASSISTED FOR HIGH DENSITY
-  EASY MANUAL OPERATION
-  STURDY & ROBUST CONSTRUCTION
-  CHANGEABLE MOULDS FOR VARIOUS SIZES
-  LOW MAINTENANCE & LONG LIFE

BUILT STRONG

ENGINEERED SMART

PERFORMANCE ASSURED

[www.superforceindia.com](http://www.superforceindia.com)

## HYDRAULIC CLAY & CEMENT BRICKS BLOCK MAKING MACHINE

### MULTIPLE PRODUCTION

A robust and efficient production solution designed for manufacturing clay and cement bricks, paver blocks, hollow blocks, and solid blocks with dependable performance and output consistency.

**MULTI PRODUCT OUTPUT –**  
Suitable for bricks, paver blocks, hollow blocks, and solid blocks.

**STRONG HYDRAULIC SYSTEM –**  
Delivers stable pressing force for consistent production.

**HEAVY DUTY STRUCTURE –**  
Built for long service life and reliable operation.

**EASY OPERATION –**  
User-friendly controls support smooth day-to-day production.

## ROOF TILES MAKING MACHINE

A high-performance machine engineered for efficient roof tile production with accurate shaping, reliable operation, and durable build quality for continuous industrial use.

**PRECISE TILE FORMING –**  
Designed for accurate and uniform roof tile production.

**ROBUST CONSTRUCTION –**  
Heavy-duty build for stable long-term performance.

**PRODUCTIVE WORKFLOW –**  
Supports efficient production with smooth operation.

**LOW MAINTENANCE –**  
Quality components help reduce downtime and maintenance effort.

BUILT STRONG

ENGINEERED SMART

PERFORMANCE ASSURED

## ROAD CONSTRUCTION MACHINERY

High-performance road construction machinery built for durability, efficiency, and superior performance. Ideal for concrete finishing, surface leveling, and road development projects.

### POWERFUL MOTOR

High-torque motor for smooth and efficient operation.

### DURABLE & RELIABLE

Heavy-duty construction ensures long life and low maintenance.

### EASY TO OPERATE

User-friendly controls for precise and hassle-free operation.

### HIGH PERFORMANCE

Designed for superior results on concrete surfaces and roads.

## EGG LAYING BLOCK, SOLID BLOCK & HOLLOW BLOCK MAKING MACHINE

Advanced block making machine for producing high-quality egg laying blocks, solid blocks, and hollow blocks with precision, strength, and high productivity.

### MULTI-BLOCK PRODUCTION

Produces egg laying, solid, and hollow blocks with excellent quality and consistency.

### STRONG & STURDY FRAME

Heavy-duty structure for long-lasting durability and stability.

### HIGH PRODUCTION CAPACITY

Efficient and fast operation for maximum output.

### PRECISE & UNIFORM BLOCKS

Ensures strong, uniform, and high-quality blocks every time.

# ADVANCED MACHINE SYSTEMS

## MULTI STATION BRICKS PAVER BLOCK MAKING MACHINE

High-performance multi station machine designed for producing bricks, paver blocks, solid blocks, and hollow blocks with maximum efficiency and precision.

### MULTI STATION OPERATION

Multiple work stations for pressing, vibration, and ejection ensures high productivity.

### STRONG & DURABLE STRUCTURE

Heavy-duty frame and precision components for long life and reliable performance.

### VERSATILE PRODUCTION

Produces bricks, paver blocks, solid blocks, and hollow blocks in various sizes and shapes.

### EASY TO OPERATE

User-friendly controls for smooth operation and consistent output with minimal labor.

### LOW MAINTENANCE

Simple design with quality parts ensures low maintenance and maximum uptime.

## PAN MIXER

High-efficiency pan mixer designed for uniform and rapid mixing of concrete, mortar, and other construction materials. Ideal for consistent mix quality and high-performance results.

### UNIFORM MIXING

Pan and blades design ensures thorough and consistent mixing of all materials.

### HEAVY DUTY CONSTRUCTION

Robust build for long life, durability, and reliable performance in tough working conditions.

### POWERFUL MOTOR

High-performance motor for efficient mixing and continuous operation.

### EASY DISCHARGE

Bottom discharge door for quick and complete unloading.

### LOW MAINTENANCE

Simple structure with quality components for low maintenance and reduced downtime.

BUILT STRONG

ENGINEERED SMART

PERFORMANCE ASSURED

[www.superforceindia.com](http://www.superforceindia.com)

## CONCRETE MIXER WITH LIFT

Engineered for efficient concrete mixing and convenient material lifting, this machine enhances productivity and reduces manual effort on construction sites.

### EFFICIENT MIXING

Uniform and rapid mixing for top-quality concrete.

### LIFT ASSIST SYSTEM

Built-in lift for easy and safe material handling.

### ROBUST BUILD

Heavy-duty structure built for rough site conditions.

### EASY OPERATION

User-friendly controls for smooth and reliable operation.

## MANUAL HYDRAULIC PRESS FOR MULTI PRODUCTION

Versatile and reliable solution for producing high-quality blocks, pavers, and tiles with precision and durability.

### MULTI PRODUCT OUTPUT

Ideal for blocks, pavers, tiles, and various concrete products.

### MANUAL HYDRAULIC POWER

Smooth manual operation with high pressing efficiency.

### DURABLE FRAME

Strong steel construction ensures long-lasting performance.

### LOW MAINTENANCE

Simple design with easy maintenance and service.

## **40 TON PAVER TILES BRICKS MAKING MACHINE**

High-performance hydraulic machine designed for manufacturing paver tiles, bricks, blocks, and other concrete products with superior strength, precision, and consistency.

**HEAVY-DUTY HYDRAULIC POWER**  
Delivers powerful and consistent pressure for high productivity and long service life.

**HIGH COMPRESSION STRENGTH**  
Produces strong, dense, and durable products with excellent load-bearing capacity.

**PRECISION MOULDING**  
Accurate mould alignment ensures uniform shape, smooth finish, and minimal wastage.

**DURABLE INDUSTRIAL PERFORMANCE**  
Built with premium components and robust structure for reliable performance in demanding environments.

## **ROAD CONSTRUCTION MACHINERY**

Robust and portable road construction solution designed for efficient compaction and reliable performance at construction sites.

**RELIABLE OPERATION**  
Smooth and consistent performance for long hours in demanding work conditions.

**PORTABLE MOBILE DESIGN**  
Compact and easy to move, ideal for on-site and remote applications.

**EFFICIENT FIELD PERFORMANCE**  
Delivers effective compaction and improved productivity on every project.

**RUGGED CONSTRUCTION**  
Heavy-duty build with premium components for durability and long service life.

## BRICKS CUTTING MACHINE MULTI CUT

A precision-engineered multi cut brick cutting machine designed for clean, accurate, and efficient cutting of bricks and blocks. Built for durability and smooth workflow, it improves consistency and productivity in manufacturing operations.

**MULTI CUT OPERATION –**  
Efficiently cuts multiple bricks with consistent sizing.

**PRECISION CUTTING –**  
Ensures clean edges and uniform product finishing.

**HEAVY-DUTY FRAME –**  
Robust construction for long service life.

**EASY OPERATION –**  
User-friendly layout for reliable day-to-day use.

## FOLDING WALL PRODUCTS MAKING MACHINE

A reliable vibration-based production solution developed for folding wall products making. It supports stable output, strong compaction, and durable performance for continuous industrial applications.

**UNIFORM VIBRATION –**  
Supports even compaction and better product quality.

**STRONG CONSTRUCTION –**  
Built for dependable industrial performance.

**LOW MAINTENANCE –**  
Simple structure for convenient upkeep.

**HIGH PRODUCTION EFFICIENCY –**  
Designed for smooth and productive operation.

## PLC CONTROLLER

High-performance PLC controller designed for automation, precision control, and reliable operation. Ensures efficient monitoring and seamless integration for industrial applications.

**ADVANCED AUTOMATION**  
Smart PLC system for accurate and efficient control of all operations.

**USER FRIENDLY INTERFACE**  
Intuitive HMI panel for easy monitoring and parameter settings.

**RELIABLE PERFORMANCE**  
Stable and robust control for continuous and safe operations.

**FLEXIBLE & SCALABLE**  
Easily adaptable to various equipment and future system upgrades.

## CEMENT SILO

High-capacity cement silo designed for safe storage, efficient material handling, and long-lasting durability. Ideal for ready mix concrete plants and construction projects.

**HIGH STORAGE CAPACITY**  
Available in various capacities to meet different project requirements.

**STRONG & DURABLE**  
Heavy-duty steel construction for long life and reliable use.

**SAFE & SECURE DESIGN**  
Equipped with safety ladder, handrail and top vent filter for secure operation.

**SMOOTH DISCHARGE**  
Conical bottom with outlet gate ensures smooth flow and minimal wastage.

## FULLY AUTOMATIC FLY ASH BRICKS MAKING MACHINE

- ✓ Fully Automatic / Semi Automatic
- ✓ High Strength & Durable Body
- ✓ Low Maintenance
- ✓ Fast Production Speed
- ✓ Electricity & Labour Saving
- ✓ High Quality Output

### OUR PRODUCT RANGE

#### 1 PAN MIXTURE

#### 2 AUTOMATIC UPPER PRESS MACHINE

#### 3 PAN MIXTURE

#### 4 TABLE VIBRATOR

#### 5 HYDRAULIC TROLLEY

#### 6 BATCHING PLANT

#### KEY BENEFITS

- ✓ High Strength & Durable Body
- ✓ Low Maintenance
- ✓ Fast Production Speed
- ✓ Electricity & Labour Saving
- ✓ High Quality Output
- ✓ Fully Automatic / Semi Automatic

#### IDEAL FOR

Manufacture of high quality Fly Ash Bricks for construction projects, commercial buildings, housing societies, and infrastructure development.

#### PRODUCT RANGE / APPLICATIONS

- + Fly Ash Bricks
- + Solid Blocks
- + Paver Blocks
- + Hollow Blocks
- + Interlocking Blocks
- + Kerb Stones & More

#### WHY SUPERFORCE?

- ✓ High Quality Machines
- ✓ Long Life & Durability
- ✓ Low Maintenance
- ✓ High Production Output
- ✓ Expert Support & Service
- ✓ Better ROI

ADVANCED  
TECHNOLOGY

BEST QUALITY  
MACHINES

TIME SAVING  
OPERATIONS

PROFITABLE  
INVESTMENT

## SFI 45CM<sup>3</sup> BATCHING PLANT

A high-capacity batching solution engineered for accurate material proportioning and consistent concrete production. Built for durability, efficiency, and reliable performance.

**High Mixing Efficiency**  
Optimized mixing system for uniform, high-quality output.

**Reliable Material Feeding**  
Precision feeding and weighing for accurate batching.

**Stable Continuous Operation**  
Robust structure ensures smooth and uninterrupted production.

## MINI TILES ADHESIVE MAKING MACHINE

A compact and efficient solution for producing high-quality adhesive powders and tile adhesives with uniform blending and consistent performance.

**Compact Production Setup**  
Space-saving design ideal for small to medium production units.

**Uniform Material Blending**  
Advanced mixing system ensures homogeneous and consistent quality.

**Easy Operation & Maintenance**  
User-friendly operation with easy access for maintenance and cleaning.

## READY MIX CONCRETE BATCHING PLANT CM30

Engineered for performance and reliability, the CM30 batching plant delivers accurate proportioning, efficient material handling, and consistent concrete quality for all construction projects.

### ACCURATE BATCHING

Precision weighing system ensures exact mix proportions every time.

### EFFICIENT MIXING

Twin shaft mixer provides uniform and high-quality concrete.

### ROBUST CONSTRUCTION

Heavy-duty structure built for long life and dependable performance.

## MOULD REMOVER VIBRATOR MACHINE

A compact and durable support machine designed for efficient mould removal with vibration-assisted operation, ensuring smooth workflow and improved production efficiency.

### VIBRATION SUPPORT

High-frequency vibration for effective mould loosening and easy removal.

### COMPACT DESIGN

Space-saving structure for easy installation and operation.

### DURABLE CONSTRUCTION

Sturdy build quality for long service life in demanding environments.

## HIGH QUALITY MULTIPLE PRODUCTION FULLY AUTOMATIC PLANT

Hydraulic with Vibro Technology

A fully automatic, high-capacity production plant engineered for precision block and concrete product manufacturing. Built with advanced hydraulic and vibro technology, it delivers exceptional automation, high productivity, consistent quality output, and long-lasting performance for demanding operations.

### Fully Automatic Operation

High efficiency with minimal manual intervention.

### Hydraulic & Vibro Technology

Ensures strong compaction and superior product quality.

### High Productivity & Durability

Consistent output with robust, long-lasting construction.

## MATERIAL HANDLING TROLLEY

A robust and reliable handling trolley designed for easy transport and smooth movement of materials in industrial and construction environments. Built for strength, ease of use, and long-term reliability in demanding applications.

### Heavy-Duty Construction

Strong frame for maximum load capacity and durability.

### Smooth & Effortless Movement

High-quality wheels for easy maneuverability and safe handling.

### Ergonomic & Reliable Design

User-friendly handle design for comfortable operation and long-term reliability.

## SFI 10 HYDRAULIC WITH VIBRO TECHNOLOGY MULTI PURPOSE MACHINE

Robust hydraulic block and paver production system engineered for reliable output, consistent compaction, and efficient multipurpose manufacturing performance.

**High Production Efficiency**  
Maximizes output with optimized cycle performance.

**Reliable Vibro Compaction**  
Ensures uniform density and superior strength.

**Versatile Product Output**  
Produces a wide range of blocks, pavers, and construction units.

## SFI 20CM<sup>3</sup> BATCHING PLANT

Compact and dependable batching plant designed for accurate material proportioning, smooth feeding, and efficient support for modern production operations.

**Accurate Material Feeding**  
Precision weighing and feeding for consistent mix quality.

**Compact Plant Design**  
Space-saving structure for easy installation and operation.

**Consistent Batch Performance**  
Ensures uniform batching for reliable production results.

## MINI BLOCK MAKING MULTI PURPOSE MACHINE

The Mini Block Making Multi Purpose Machine is a compact and efficient solution for producing high-quality blocks and pavers. Engineered for versatility and ease of operation, it delivers consistent results with minimal maintenance, making it ideal for small to medium scale construction projects.

### COMPACT DESIGN

Space-saving structure ideal for small workspaces and easy installation.

### RELIABLE OUTPUT

Delivers consistent and high-quality blocks & pavers with superior efficiency.

### VERSATILE APPLICATION

Suitable for a wide range of block and paver types to meet diverse needs.

## PAN MIXER WITH HOPPER

The Pan Mixer with Hopper ensures efficient material feeding and uniform mixing for superior concrete quality. Built for high productivity and long-lasting performance, it is the perfect choice for construction and block making operations.

### EFFICIENT FEEDING

Large capacity hopper for smooth and continuous material flow.

### UNIFORM MIXING

High performance pan mixer ensures homogeneous and consistent mixing.

### ROBUST BUILD

Heavy-duty construction for durability, stability, and long service life.

## SFI 8 AUTOMATIC MULTI PURPOSE MACHINE HYDRAULIC WITH VIBRO TECHNOLOGY

Advanced automatic multipurpose machine engineered for efficient production of concrete blocks, paver blocks, and allied products. Designed for stable performance, precise output, and reliable operation in demanding manufacturing environments.

**Automatic Operation**  
Improves consistency and productivity.

**Vibro Technology**  
Ensures compact, uniform block formation.

**Robust Construction**  
Built for long-lasting industrial use.

## CLAY BRICKS MAKING MACHINE

Compact and efficient clay bricks making machine designed for dependable shaping and production performance. Ideal for small to medium scale manufacturing with easy operation, durable build quality, and consistent brick output.

**Consistent Production**  
Uniform brick formation with reliable output.

**Efficient Design**  
Optimized for smooth working performance.

**Heavy-Duty Build**  
Strong structure for daily industrial use.

# ADVANCED MACHINE SYSTEMS

## SFI 12 FULLY AUTOMATIC HYDRO WITH VIBRO TECHNOLOGY MULTI PURPOSE MACHINE

Advanced fully automatic machine with hydraulic pressing and vibro technology for superior strength and durability. Ideal for manufacturing concrete blocks, pavers, and special products with high output and precision.

## SFI 08 AUTOMATIC MULTI PURPOSE MACHINE

Fully automatic multi purpose machine designed for high efficiency and precision. Produces concrete blocks, pavers, and other custom products with excellent consistency and minimal manual intervention.

## TILES ADHESIVE MULTI PURPOSE PRODUCTION PLANT

Integrated production plant designed for efficient manufacturing of tile adhesive and related dry-mix materials. Built for consistent batching, dependable material flow, and reliable high-volume output with industrial-grade performance.

**High Production Capacity**  
Engineered for continuous high-volume operations.

**Smart Material Flow**  
Optimized conveying and batching for efficiency.

**Versatile Applications**  
Suitable for multiple dry-mix construction materials.

**Robust & Reliable Design**  
Built for durability and long-term performance.

## LATEST TECHNOLOGY PAN MIXER

Advanced pan mixer engineered for uniform blending, fast mixing cycles, and superior material consistency. Designed for robust industrial use, dependable performance, and precision mixing across a wide range of construction material applications.

**High-Efficiency Vortex Mixing**  
Ensures uniform, lump-free mixing in every batch.

**Advanced Control System**  
Intelligent controls for precise mixing and consistency.

**Heavy-Duty Construction**  
Built to withstand tough industrial environments.

**Reliable Performance**  
Consistent results with reduced maintenance and downtime.

## CLAY BRICKS MAKING MACHINE

Engineered for efficient clay brick production, ensuring consistent quality, reliable performance, and long-term durability. Built to meet the demands of modern brick manufacturing with precision and productivity.

### CONSISTENT OUTPUT

Produces uniform bricks with high accuracy and minimal waste.

### ROBUST CONSTRUCTION

Heavy-duty components ensure strength, reliability, and long life.

### EFFICIENT OPERATION

Optimized design for smooth operation and maximum productivity.

## MANUAL BRICKS PAVER BLOCK MULTI PURPOSE MACHINE

Ideal for manual production of bricks and paver blocks, this versatile machine offers dependable performance, wide application, and compact design for efficient small-scale operations.

### VERSATILE APPLICATION

Suitable for bricks, paver blocks, and various concrete products.

### EASY OPERATION

Manual system for simple, user-friendly operation.

### DURABLE BUILD

Sturdy construction ensures long service life and reliability.

## FORKLIFT

Engineered for strength, stability, and superior maneuverability. Our forklifts deliver exceptional lifting performance, operator comfort, and safety for material handling operations across industries.

**High Load Capacity**  
Built to handle heavy loads with ease and reliability.

**Enhanced Safety**  
Advanced stability and safety features for secure operations.

**Max Productivity**  
Optimized performance for faster material handling.

## SFI LATEST TECHNOLOGY HYDRAULIC PRESS MULTI DESIGN PRODUCTION

Designed for precision, power, and durability. Our hydraulic presses ensure consistent results, high efficiency, and versatility for a wide range of industrial applications.

**Precision Engineering**  
Advanced control for accurate and consistent results.

**Heavy-Duty Performance**  
Robust construction for continuous high-pressure operations.

**Versatile Applications**  
Ideal for forming, molding, stamping, and multiple industrial processes.

# ADVANCED MACHINE SYSTEMS

## SFI EGG LAYING MACHINE

Compact and efficient concrete block production machine designed for on-site block manufacturing. Engineered for easy operation, consistent performance, and long-lasting durability, ideal for small to medium-scale projects.

## SFI 4 MANUAL VIBRO MULTI PURPOSE MACHINE

Manual vibro-powered multipurpose machine ideal for producing concrete blocks, pavers, and allied products. Built for reliable performance, easy operation, and simple maintenance to deliver consistent results.

## MATERIALS HANDLING HYDRAULIC TROLLEY

Engineered for efficient material transport, the hydraulic trolley ensures smooth handling and easy movement of heavy loads in block manufacturing and industrial operations. Built for durability, stability, and long-lasting performance in demanding environments.

## SFI 6 MULTI PURPOSE MACHINE

A powerful and versatile solution for multipurpose production. The SFI 6 delivers efficient block and paver manufacturing with high productivity, precision, and consistent quality. Designed for reliability, built for durability, and engineered to perform in the toughest industrial conditions.

# ADVANCED MACHINE SYSTEMS

## AAC PLANT

Engineered for precision and efficiency, our AAC Plant delivers superior quality lightweight blocks with high productivity, energy efficiency, and consistent performance for modern construction demands.

## SFI 16 FULLY AUTOMATIC HIGH QUALITY LATEST TECHNOLOGY MULTI PURPOSE MACHINE

Advanced fully automatic multi purpose machine for high-quality block, paver, and tile production. Built with the latest technology for maximum performance, precision, and reliability.

# ADVANCED MACHINE SYSTEMS

## VIBRATOR MULTI PRODUCTION PLANT SFI VBT

High-performance vibrator based plant for efficient production of concrete blocks, pavers, and allied products. Engineered for consistent output, durability, and minimal maintenance with optimized material flow and superior vibration technology.

## FULLY AUTOMATIC MULTI PURPOSE MACHINE SFI 12

Fully automatic multi purpose plant for the manufacturing of concrete blocks, pavers, and allied products. Integrated systems ensure high productivity, consistent quality, and reduced labor dependency for maximum efficiency.

# ADVANCED MACHINE SYSTEMS

## SFI 08 AUTOMATIC MULTI PURPOSE MACHINE

Fully automatic multi purpose machine designed for high efficiency and precision. Produces concrete blocks, pavers, and other custom products with excellent consistency and minimal manual intervention.

## CONVEYOR BELT

Heavy-duty conveyor belt engineered for reliable material handling and smooth transportation in block manufacturing and allied industrial applications. Built for durability, efficiency, and long operational life.

# ADVANCED MACHINE SYSTEMS

## SFI 04 AUTOMATIC MULTI PURPOSE MACHINE

High-capacity automatic multi purpose machine engineered for the production of concrete blocks, pavers, and specialty products with superior precision, durability, and productivity.

## CONVEYOR BELT

Heavy-duty conveyor belt designed for reliable material handling and smooth transportation in block manufacturing and allied industrial applications.

# SUPER FORCE | REINFORCED CONCRETE PIPE MACHINE

PIPE DIAMETER RANGE:  
**300mm to 1000mm**

PIPE LENGTH:  
**Up to 1500mm**

VIBRATION POWER:  
**7.5 HP (Dual Motors)**

PRODUCTION RATE:  
**Adjustable Pipes / Day**

MATERIAL COMPATIBILITY:  
**Concrete, Fly Ash**

# ADVANCED MACHINE SYSTEMS

## SFI 10 VIBRO WITH HYDRO TECHNOLOGY

MULTI PURPOSE MACHINE

Advanced vibro with hydro technology ensures superior compaction, high output, and consistent quality for a wide range of concrete products.

## SFI 06 HYDRAULIC WITH VIBRO TECHNOLOGY

WITHI AUTOMATIC STACKER  
MULTI PURPOSE MACHINE

Hydraulic with vibro technology combined with automatic stacker for efficient production, easy operation, and maximum productivity.

# 4 WHEEL TROLLEY

## HEAVY DUTY INDUSTRIAL CART

STRONG • DURABLE • RELIABLE • BUILT FOR INDUSTRY

### HEAVY DUTY

Built with premium quality material for long lasting use.

### HIGH LOAD CAPACITY

Designed to handle heavy industrial loads with ease.

### SMOOTH MOBILITY

4 strong wheels for better balance and easy movement.

### LOW MAINTENANCE

Rugged construction ensures minimal maintenance.

### DURABLE & RELIABLE

Perfect for factories, warehouses and construction sites.

DESIGNED FOR PERFORMANCE

MADE FOR INDUSTRY

### IDEAL FOR

- ✓ Warehouses
- ✓ Factories
- ✓ Construction Sites
- ✓ Material Transport

### PRODUCT ADVANTAGES

- ✓ Easy Handling
- ✓ Stable 4-Wheel Base
- ✓ Heavy Load Ready
- ✓ Smooth Mobility

- ✓ QUALITY PRODUCTS
- ✓ TIMELY DELIVERY
- ✓ COMPETITIVE PRICES
- ✓ CUSTOMER SATISFACTION

# ADVANCED MIXER SYSTEMS

## REVERSIBLE CONCRETE MIXER WITH PUMP

Versatile concrete mixing and pumping solution engineered for efficient on-site construction work. Combines reliable mixing performance with smooth material transfer, helping reduce labor effort and improve productivity.

## SELF LOADING CONCRETE MIXER

Advanced self-loading mixer designed for mobile batching, easy operation, and dependable concrete output. Ideal for projects requiring flexible transportation, mixing, and fast on-site production in one compact machine.

## CONCRETE MIXER WITH HOPPER SFI CM1

Compact and durable mixer with hopper system built for smooth material feeding and consistent concrete mixing performance. Suitable for routine construction operations where reliability and efficiency are essential.

# SFI-JS1000 PREMIUM MIXER

ENGINEERED FOR PERFORMANCE. BUILT TO LAST.

High-performance twin shaft concrete mixer designed for consistent quality, maximum durability and superior mixing efficiency.

**HEAVY DUTY CONSTRUCTION**  
Built with high-grade materials for long service life.

**TWIN SHAFT TECHNOLOGY**  
Ensures uniform mixing and high output efficiency.

**HIGH MIXING PERFORMANCE**  
Optimized design for fast, consistent and homogeneous mixing.

**SMART CONTROL SYSTEM**  
User-friendly interface for precision and operational ease.

**RUGGED & RELIABLE**  
Engineered for harsh job site conditions.

**HIGH PRODUCTIVITY**  
Delivers superior output with minimal downtime.

**LOW MAINTENANCE**  
Easy access design for quick inspection and service.

**QUALITY ASSURED**  
Manufactured to strict quality standards.

## 100% RECYCLED PLASTIC CORRUGATED ROOFING SHEETS

Sustainable roofing solution made from post-consumer recycled plastic. Our corrugated roofing sheets are lightweight, weather-resistant and built to last—reducing plastic waste while delivering reliable roofing performance.

Recycle Today.  
Build Tomorrow.

### RECYCLED PLASTIC CORRUGATED ROOFING SHEET

Lightweight, weather-resistant roofing solution made from recycled plastic.

## OUR PRODUCTS

### ECO ROOF PRO BLACK CORRUGATED SHEET

Premium black marble-look recycled roofing sheet with durable finish.

### RECYCLED PLASTIC CORRUGATED ROOFING SHEET

Lightweight, weather-resistant roofing solution made from recycled plastic.

### RECYCLED PLASTIC BLOCK

Durable recycled plastic block for partitions, paving, and utility applications.

## PRODUCT HIGHLIGHTS

**100% RECYCLED PLASTIC**  
Made entirely from post-consumer recycled plastic waste.

**ECO-FRIENDLY**  
Diverts plastic waste from landfills and oceans, supports a cleaner planet.

**WEATHER RESISTANT**  
Designed to withstand harsh weather conditions and UV exposure.

**DURABLE & LIGHTWEIGHT**  
Strong, impact-resistant yet easy to handle and install.

**LOW WATER ABSORPTION**  
Resistant to moisture, rot and corrosion.

**COST EFFECTIVE**  
Premium quality with lower long-term maintenance and replacement costs.
